“Ne Angime” website

Fall 2023

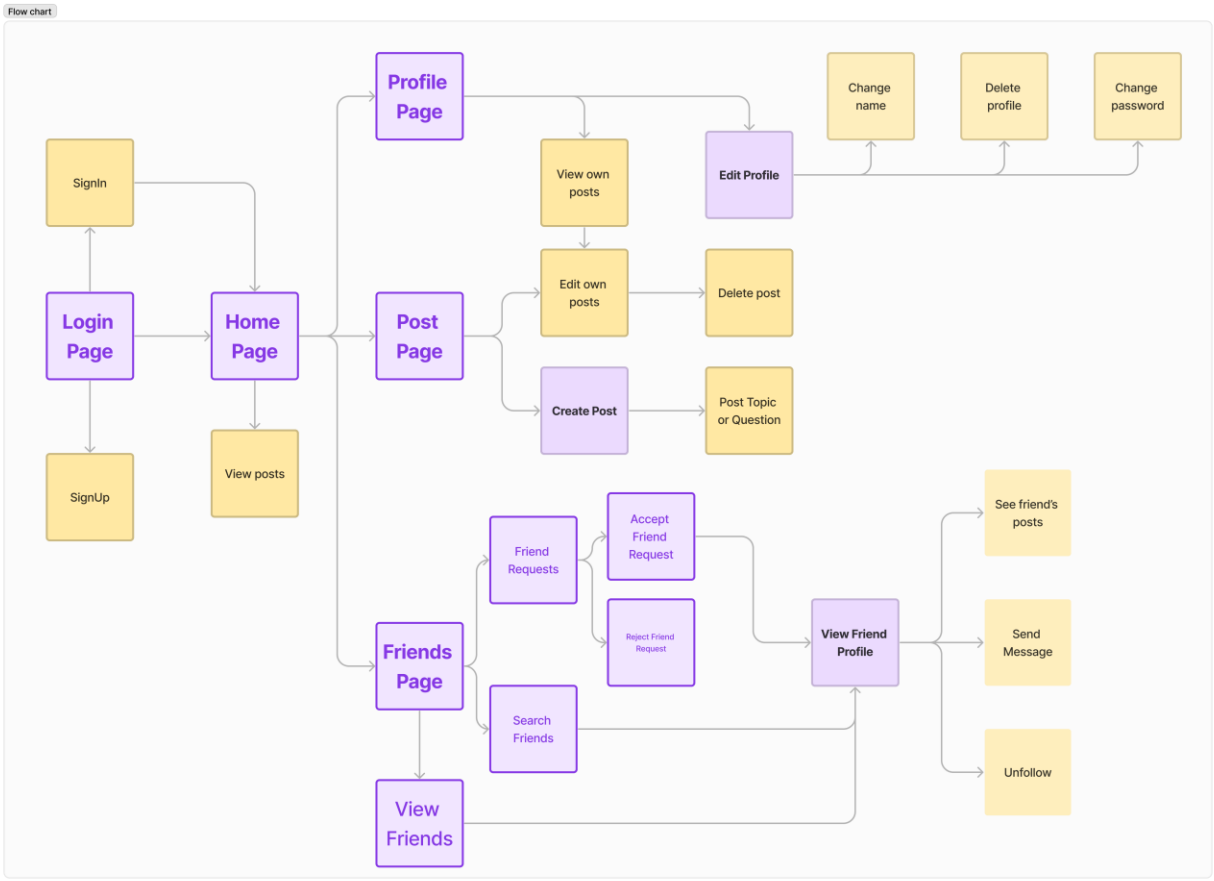

Rakhat Bektas

1. **Project description**
   Ne Angime website. This website is similar to Reddit and Quora. On these websites people are able to ask question and get answers from different people around the world and post topics. On Ne angime users will be able to create accounts, follow friends, post questions or topics, post answers and react to posts.

2. **List of <u>detail</u> user level, not programming level, features with descriptions**
   Sample:

User-level features	Descriptions
Unfollow	Unfollow people user follows
Posting a question/topic	Post a question or topic for people to see
Find friends	Find friends user know based on their nickname on website
Follow	Follow people user is interested in their posts
Answer and react to posts	Write answers to questions someone posted and react to someone’s topic post
Delete own posts/questions	Be able to delete own posts or questions
Delete account	Be able to delete account from database
Change account settings	Be able to change nickname, password

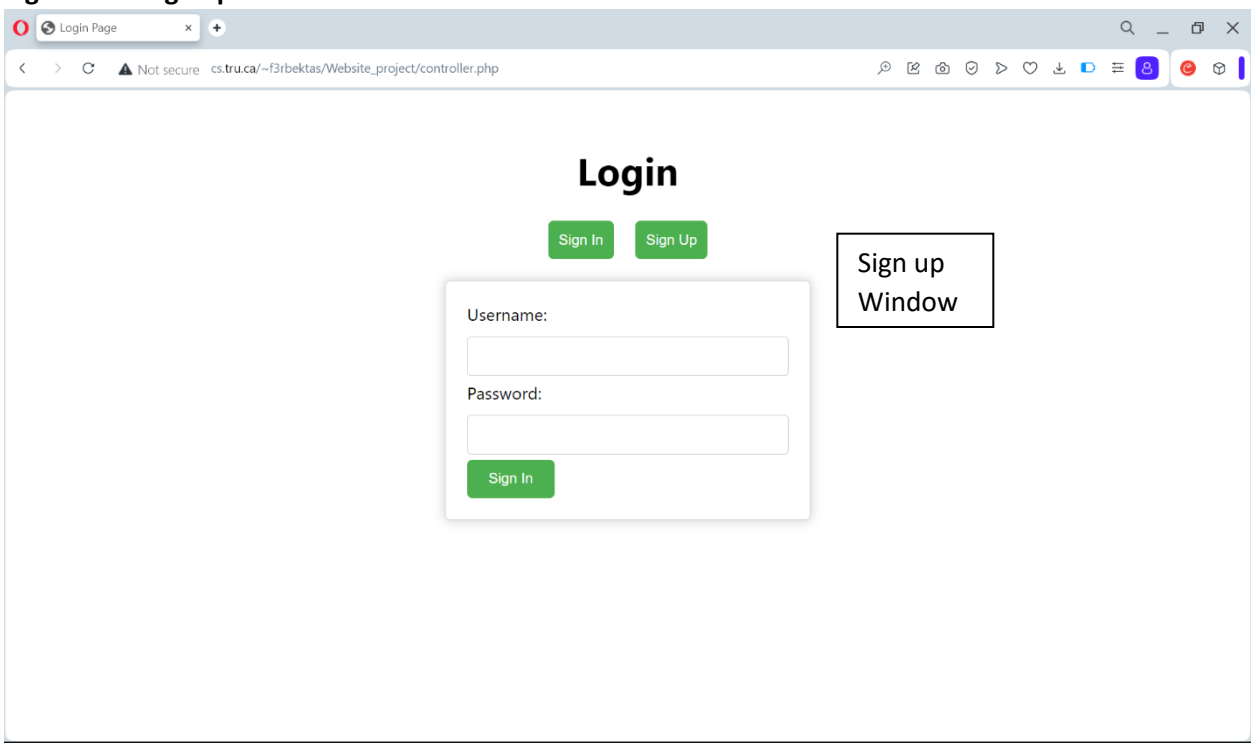

3. **Page layout diagrams, and user interface**

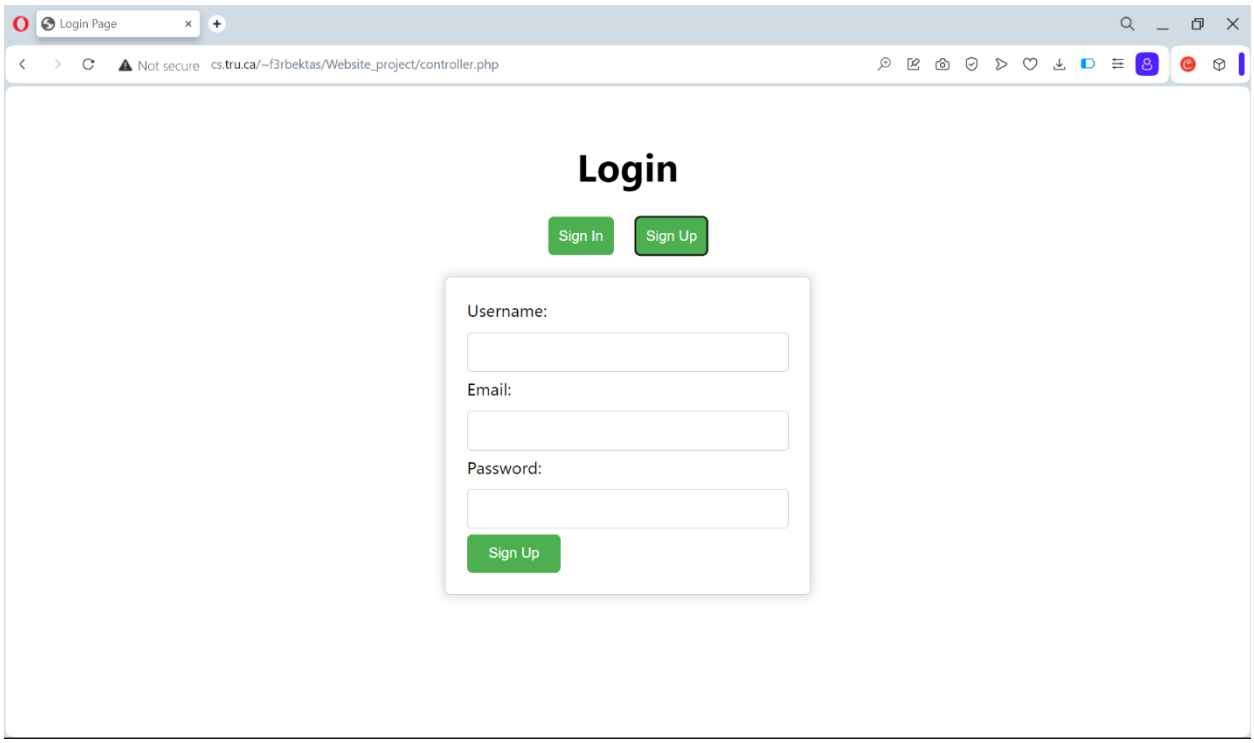

4. Test procedures

Note. Update the table whenever you complete/update a user-level feature.
